California Voluntary Carbon Markets Disclosure (AB-1305)

The Voluntary Carbon Market Disclosures Act, Assembly Bill No. 1305 ("AB-1305"), requires entities doing business in California to disclose specified information regarding the marketing, sale, purchase, or use of certain voluntary carbon offsets under Sections 44475 and 44475.1. In addition, AB-1305 requires disclosure of specified information regarding claims of net zero achievement, carbon neutrality, or significant greenhouse gas ("GHG") emissions reductions under Section 44475.2.

Rogers Corporation ("Rogers") provides this disclosure in conjunction with our 2025 Sustainability Report Supplement and Rogers' 2024 ESG Report to fulfill our requirements under AB-1305.

Rogers and its related entities do not engage in the marketing or sale of voluntary carbon offsets within California as defined by Section 44475. Moreover, we have not depended on the acquisition or utilization of voluntary carbon offsets to support any public declarations concerning the attainment of net zero emissions, carbon neutrality, or significant GHG emission reductions.

Rogers has adopted a target to reduce Scope 1 and 2 GHG emissions companywide in our manufacturing operations by 20% by 2030 compared to our 2022 base year.

We utilize the Greenhouse Gas Protocol for reporting greenhouse gas emissions. Additional information on Rogers' GHG emissions targets, as well as the supporting GHG emissions data, can be found at pages 4-5 of our 2025 Sustainability Report Supplement and pages 16-18 of our 2024 ESG Report.

An independent third party, Cameron-Cole, has validated our GHG data and emissions calculation methodologies. This review and limited assurance promote accurate disclosures that align with accepted reporting practices. The verification opinion for our most recent GHG inventory is located on Rogers' website at our <u>Sustainability Report</u> page.
